

# Customized secure forms

**ANON::form** is in many ways a unique solution where a selection of long-proven techniques and services are packaged with the goal of creating an easy-to-use and confident communication with e-mail and secure forms.

In the service "E2EE Form BASIC" everything is pre-packaged, it is the easiest option to quickly get started with our secure forms for websites and webpages that are good enough for the small need.

For the greater need, we offer completely tailored solutions; everything from your own form design to operation on your own server, with us or with you, or fully integrated into your existing solutions.

We are also happy to help with the "turn key" launching E2EE secure email for all or parts of your organization, including domain names and anything else needed.

**ANON::form** is run by staff with long and broad experience in digital security and development of software and web services, we keep our promises. Discretion is a matter of course for us.

What are the needs of you and your organization? Get in touch for more info

and a discussion about how we can help you!
